Disadvantages of Long Cloaks and Ulsters for Rainy Day Wear---Advice to the Engaged of Both Sexes. Something About Trinkets.

There is neither grace nor economy, according to the French dressmaker's way of thinking, in an ulster or long cloak for rainy days or country travel. The cloth is so heavy as a rule that it is impossible to hold it up out of the dirt without much fatigue. She advises the purchase of a good mackintosh and a trim little walking jacket.

The women of North Carolina are organizing throughout the state for the purpose of raising the \$10,000 with which to erect the state building for the World's Fair. The building will be a reproduction of the "Tryon palace," a celebrated structure which was the home of the governor in colonial days. The women also contemplate placing in the Woman's building a memorial to Virginia Dare, who, it is claimed, was the first white child born in this counter.

Trinkets, favors and small ware designed for a dinner table end their days on the writing or toilet table. Among them are the little trays used for holding burnt almonds and bonbons, two little plates, one above the other. fixed on Japanese bamboo tripods, all in the same lacquer; the menu holders, with a miniature spiral flower-holder on cach side, and the tall flower or grass holders, ständing over a foot high. These last have only recently appeared, and are large editions of the small ones, lately so popular. On a delicate tinted brocade table center, these silver ornaments (all moderate in price) look most effective, and also they harmonize with any silver plate for the toilet table. There is a silvor lacquer powder puli box, with a simulated lace frill round the top, inclosing a velvet pincushion fixed on the lid, and some long, narrow pincushions set into silver, which open to admit the bonnet pin or hairpins. There are also some hearts in red or dark green leather, lined with velvet, for holding trinkets. These hearts, in several sizes, with lids, are fitted up as neat little work-boxes.
